

Status of ConT_EXt

Hans Hagen

We all know that ConT_EXt is a fast moving target. It is therefore a good thing to shortly present the current status of development.

fonts	new loader, stable interfaces, related mechanisms can be cleaned up, extensions possible	publications	getting there, documentation pending
hyphenation	experimental, normalization considered	color	stable
spacing	functional stable, maybe some cleanup needed	backend	stable, awaiting some cleanup in engine backend
metafun	updated tex and backend interface, occasional additions, module for graphs pending	images	stable
math	stable, some improvements possible, maybe Lua variant (fun project)	epub	always work in progress
margins	quite okay, right2left adaption in progress	columns	mixed more or less stable, column-sets to be redone, better float support needed
structure	stable, maybe cleanup	file io	stable
conversions	stable	tables	stable, maybe some xtables extensions
sorting	works, extension possible, Japanese in progress	verbatim	stable, maybe some cleanup
		xml	stable, maybe some more helpers
		positioning	okay, optimization possible
		cldf	okay, always more possible
		layout	okay, bidi model needed
		scripts	work in progress
